# HOW MEASURE YOUR CHILD'S FEET

1

2

**1.** Grab a piece of paper, pencil and measuring tape or ruler.

Put the paper on the ground (secure it with some tape or Prestik).

Place your child's bare foot on the paper and sketch the shape of your child's foot.

**2.** Draw a line from the heel to the front of the tip of their longest toe. Measure between the lines you made to get the length measurement.

# HOW TO MAKE SURE YOUR CHILD'S SHOE IS THE PERFECT FIT

## **CHECK THE DEPTH**

Check that there's not too much pressure on the top of your child's foot by running your fingers over the top of the shoe, while asking your child to wiggle all of their toes.

## **CHECK THE WIDTH**

Once the foot (with a sock on) is in the shoe, feel the side of the shoe with your fingers to check if there are no tight spots or pressure that might cause discomfort.

# HOW TO MAKE SURE YOUR CHILD'S SHOE IS THE PERFECT FIT

## CHECK THE LENGTH

With your child's heel placed securely at the back of the shoe, the longest toe should not reach the back of the shoe. It's a good idea to leave a small gap (about a thumb's width) to allow some growing room.

## CHECK THE OVERALL FIT

The final area to check is around the opening of the shoe, just around the ankle. For girls' shoes that are cut away, run your finger around the inside edge. Make sure there are no large gaps.
